Sierra Leather Top grain leather with even coloration throughout the entire hide. Superior selection of Australian cattle hides are hand selected for Sierra. A gentle buffing and grain enhancement is applied to provide Sierra with a consistent grain structure throughout each hide and from hide to hide. Sierra is recognized industry wide for its clean surfaces and excellent cutting yields. Soft hand combined with superior technical specifications make this leather suitable for most high traffic interior applications from furniture, automotive, and marine.

Lena Leather Full grain leather with even coloration throughout entire hide. Superior selection of European and New Zealand cattle hides are hand selected for Lena. These hides are recognized industry wide for their clean surfaces and excellent cutting yields. Luxurious, soft hand and smooth supple surface make this one of the most beautiful leathers available. The protective finish allows Lena to be suitable for most public and private environments.

Vulcano Leather Vulcano combines distressed leather aesthetics with the durability of modern tanning. Hand selected European and New Zealand hides are aniline dyed with a classic marbled crackle effect. A protective non-scratch finish allows use in high traffic areas and makes Vulcano suitable for public and private environments.

Reduce Environmental Impact Green Hides leather production is REACH (EC1907/2006) compliant with aims to improve the protection of human and environmental health. Processed using low emission mineral tanning formulas which are environmentally respectful, the hides are retanned in aged oak drums using vegetable agents, natural fat liquors, oils and dyes that insure the leather is properly thoroughly dyed. Natural color variations may occur even within the same dye lot.
